

Ultimate Master Class in Dentistry – Wednesday lecture and Workshop

In this unique one day course Didier will share his comprehensive approach to using Composite Resin to restore all types of posterior teeth both vital and non vital.

** This course addresses the clinical dilemma of how to restore posterior root canal treated teeth. Do they all need crowns? What if the patient can't afford a crown, can composite be used?*

8:30 – 9am - Registration

9:00-10:30: Lecture: APR (Adhesive Posterior Restorations): direct techniques: update 2016

10:30 – 11:00 Morning Tea Break

11:00-12:30: Hands-on Part I

- Direct bi-laminar approach
- Anatomical, stress control layering and sculpting technique
- Proximal boxing for perfect contact
- Rebonding technique
- Finishing & polishing

12:30 – 13:30 Lunch Break

13:30-15:00: lecture: APR(Adhesive Posterior Restorations): luted restorations: update 2016

15:00 – 15:30 Afternoon Tea Break

15.30-17:30: Hands-on part II

- New evidenced based concepts for partial luted restorations
- IDS (Immediate Dentin Sealing)
- CDO (Cavity Design Optimization)
- CMR (Cervical Margin Relocation)
- Onlay fabrication
- Modified luting technique

17:30-18:00: Discussion & conclusions
