

Restoring the Broken Down Molar

Direct Composite, Onlay, or Crown? A two day hands-on workshop with Dr. Michael Mandikos

Friday 12th - Saturday 13th April 2019

**Rydges Hotel, 9 Glenelg Street,
South Brisbane, QLD 4000**

Price: \$3490 (+gst)

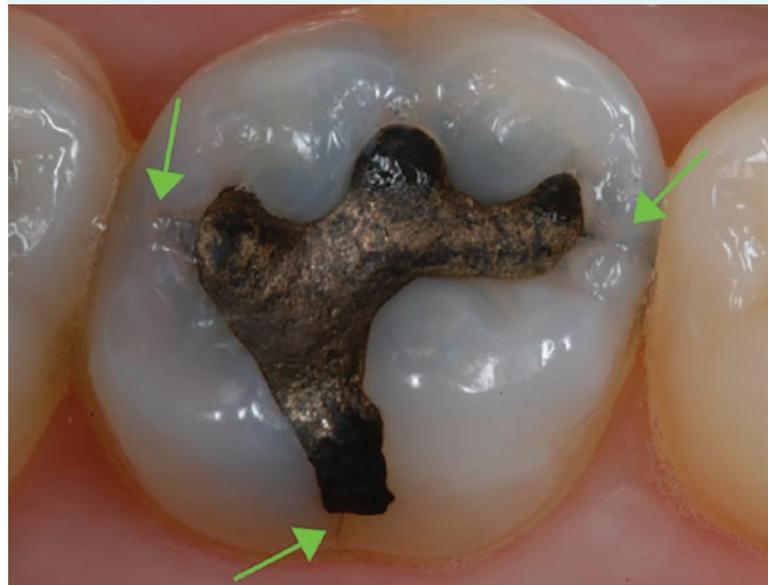

Our patients frequently present with molar teeth exhibiting old restorations with fracture lines clearly visible in the remaining enamel. Sometimes these teeth have symptoms, but other times they do not. The clinical question is: "Should we be intervening and restoring these teeth now before something happens?" Is there any evidence to support such a decision, or is it just over-treatment? Should we leave these teeth or restore them?

If the choice to intervene is made, the next decision is whether or not to restore with a direct composite, an Onlay or a Crown. What are the indications for each? And how do we present the need for these possible options to the patient?

In this 2-day workshop, Michael will cover the decision tree that determines whether or not such teeth should be treated, and then the relevant indications for either a direct approach with a Composite, an indirect approach with an Onlay (made from Composite or Porcelain), or a Crown. The hands-on exercises that accompany this program will allow attendees to practice placing perfect posterior Composites that reinforce teeth, preparing, impressing and cementing Onlays, and Crowns, and making a simple composite Onlay chairside.

WHAT YOU WILL LEARN:

- ✓ When to treat teeth with signs of breakdown.
- ✓ When to use a direct Composite, an Onlay, or a Crown.
- ✓ Restoring a molar with a Composite to reinforce the tooth.
- ✓ Preparations for Onlays and Crowns.
- ✓ Making a simple and quick chairside Composite Onlay.
- ✓ Cementation of an Onlay and Crown.

Direct Composite

Porcelain Onlay

Full Crown

Online registration at www.ceodental.com.au

This course will provide a certificate of attendance for 14 hours of scientific CPD points. The course will start at 9am on Friday, and at 8am on the Saturday, to allow for those travelling on Friday morning and Saturday afternoon, to make their flights.
